

FOR IMMEDIATE RELEASE

Sectra to show latest integrated RIS/PACS radiology solutions at the SIIM Conference

Shelton, CT – May 27, 2010 – The IT and medical technology company, Sectra will demonstrate its market leading web-based RIS/PACS at the Society for Imaging Informatics in Medicine's (SIIM) annual meeting held June 3-6 in Minneapolis, MN. Visit Sectra at booth #611 to learn more about integrated RIS/PACS and breast imaging systems.

Sectra will highlight its latest web-based PACS release, IDS7. Sectra PACS is now in its 17th year of production and use by Sectra's global client base. The latest Sectra PACS release introduces several new capabilities to improve radiologists' ease of use and viewing techniques, speed image transfer and simplify system configuration and administration.

Highlights include the following:

- Advanced database architecture treats image data as multi-dimensional volumes, which helps speed the retrieval, display and comparison of large data sets.
- High performance image compression progressively transfers image data over low-bandwidth networks, and enables 3D manipulation before all data has been loaded to benefit remote reading situations.
- Enhancements to worklist management, hanging protocols and overall navigation of patient information help radiologists reduce clicks and increase productivity.

Learn more by viewing the Sectra PACS [video](#).

Sectra will also be highlighting Sectra RIS, a full-featured web-based solution that manages all aspects of radiology workflow, including: scheduling optimization, worklist management, embedded speech recognition, online report distribution and exam status updates, mammography reporting and tracking, proactive monitoring and analytics, and critical results reporting. [View a Shields Health Care Group Webinar](#) to learn how they are utilizing the Sectra RIS to achieve a \$2 million dollar return on investment.

More than 1,100 major healthcare facilities around the world continue to leverage Sectra's web-based RIS/PACS solutions to deliver world class patient care. Visit www.futureproofpacs.com for product and service information provided by Sectra North America.

About Sectra's medical operations

Sectra develops and sells IT-systems and products for radiology, mammography and orthopaedics. More than 1,100 hospitals, clinics and imaging centers worldwide use the systems daily, together performing over 52 million radiology examinations annually. This makes Sectra one of the world-leading companies within systems for handling digital radiology images. In Scandinavia, Sectra is the market leader with more than 50 percent of all film-free installations. Sectra's systems have been installed in North America, Scandinavia and most major countries in Europe and the Far East. In North America, Sectra's direct sales, service and support operation delivers leading digital imaging and radiology information systems to multiple market segments, including large hospitals, imaging centers, community hospitals and orthopaedic clinics. For more information on Sectra North America, visit www.futureproofpacs.com or visit Sectra's corporate site at www.sectra.com.

About the Sectra Group

Sectra successfully develops and sells cutting-edge products in the expansive niche segments of medical systems and secure communication systems. The company was founded in 1978 and has its roots in Linköping University in Sweden. Today, Sectra has offices in twelve countries and operates through partners worldwide. Sales in the 2009/2010 fiscal year totaled SEK 848 million. The Sectra share is quoted on the NASDAQ OMX Stockholm AB exchange. For more information, visit www.sectra.com.
